

It is important that both you and your partner have connected your ACBL number to your BBO account. Not only will you NOT receive masterpoints for your efforts if BBO cannot connect your performance to your ACBL number, but if either partner does not have their ACBL number present:

BBO will not be able to determine your current level, and you will be assigned to the "A" stratification, and

if you wish to play in a game that has an upper masterpoint limit, you will be blocked.

Please note that if you add your ACBL number to your profile, you must log out of BBO and back in to affect that change. Still, your change may take up to 24 hours to take effect...
